

Summary

MSc student in Applied Computational Science & Engineering at Imperial College London with a focus on developing innovative AI solutions for scientific research. Currently developing an AI-powered automated research platform that addresses reproducibility challenges in computational science through containerization and AI assistance. Seeking to combine entrepreneurial vision with technical expertise to revolutionize how interdisciplinary research is conducted.

Experience

PAGEPEEK LTD
Product Manager & Project Lead
 [PagePeek AI Website](#)

September 2024 - February 2025
London, UK

Led a cross-functional team of **6 developers** in developing an **AI-powered PPT generation platform**, focusing on *personalized presentation creation* through AI-generated styles.

WISUP AI LTD
Founder & Lead Developer
 [WISUP AI GitHub Organization](#)

September 2023 - Present
London, UK

Founded **Wisup AI**, leading its development with registered entities in the UK and China. Specializes in *data processing tools* and **AI-driven research automation**. Created the E2M library, achieving over **1,000+ GitHub stars**.

DTECHTIVE LIMITED
Data Scientist Full-time
 [DTECHTIVE Website](#)

September 2023 - March 2024
Shelton, England, UK

Led development of AI-powered data processing and visualization solutions. (1) Webpage to Dataset: Developed a Python API that automatically converts webpages into structured datasets using LLMs, solving challenges in dataset traceability through AI agent-based self-reflection. (2) Dataset Auto Visualization: Created a full-stack web application using Python, DuckDB, and Streamlit for natural language data interaction, with an AI-powered field optimizer enabling text-to-SQL conversion for datasets with over 1,000 fields.

DTECHTIVE LIMITED
Data Analyst Intern
 [DTECHTIVE Website](#)

June 2023 - August 2023
Shelton, England, UK

Developed data processing and analysis solutions for research papers. (1) Arxiv to Dataset: Created a system using NLP techniques and LLMs to extract relevant papers from arXiv based on user intent, achieving 98% data recall rate and 92% dataset accuracy. (2) Full Stack App: Built both frontend and backend using Python, Langchain and Streamlit, successfully delivering a product prototype.

Imperial College London
Applied Computational Science and Engineering
Excellence in Modern Programming Methods & Computational Mathematics

September 2024 - May 2025
MSc

Key Modules: Modern Programming Methods (A*), Computational Mathematics (A*), Data Science and Machine Learning (B), Deep Learning: Machine Learning with Neural Networks (B)

University of Sussex
Communications Engineering
First-Class Honours

September 2020 - July 2024
BEng

Relevant Coursework: Advanced Mathematics, Signal Processing, Machine Learning, Data Structures

Imperial College London
Applied Computational Science and Engineering
Excellence in Modern Programming Methods & Computational Mathematics

September 2024 - May 2025
MSc

Key Modules: Modern Programming Methods (A*), Computational Mathematics (A*), Data Science and Machine Learning (B), Deep Learning: Machine Learning with Neural Networks (B)
